

Thank you for your donation of 8 bikes, Sanofi!

“The bike has been life impacting. The teen is now happily going off on bike rides, they are fitter, meeting new friends, happy to go to school. **They are so much happier in themselves and the parent reports that it’s altered the home life as well. The parent attributes this all to the bike.** The teen has even been known to clean the bike when they wont clean their room.”

“A young teen who had moved schools due to horrendous bullying. The family support worker has said that since she received the bike she has been in school everyday, is working hard to catch up and is generally in a much better place than she was over a year ago. **“I dont know how you do it but you are fairy godmothers granting wishes”** I did explain how we got the bikes and the support from yourselves that it takes a village to raise a child. The family are so happy that their daughter is now in an environment where she is thriving and has a bike which gives her the freedom she needs to be a teenager”

“We provided a bike to a refugee teen living in a local hotel, at the time they hadn’t been allocated a school place and their mental health was spiralling due to being stuck in the hotel. The bike enabled them to cycle locally to the hotel and explore local parks. **When they were offered a school place the bike has enabled them to get to and from the secondary school which would have been a 50min walk.** The teen loves the bike and is so happy to have something that is theirs. The bike has given the teen some independence which they wouldn’t have had in their home country.”
